1. Match the bird to its habitat.  
*\*There is more than one right answer!*

Double-Crested Cormorant

Mountain Forest

Black-headed Grosbeak

Wetlands

Mallard

Mud Flats

Hairy Woodpecker

City Park

White-faced Ibis

Open Water

2. Animals and their habitats depend on one another. Other than food, name one way these habitats could benefit the bird. Name one way the habitat benefits from having the bird living within it.
